

Costruisci un quartiere di carta

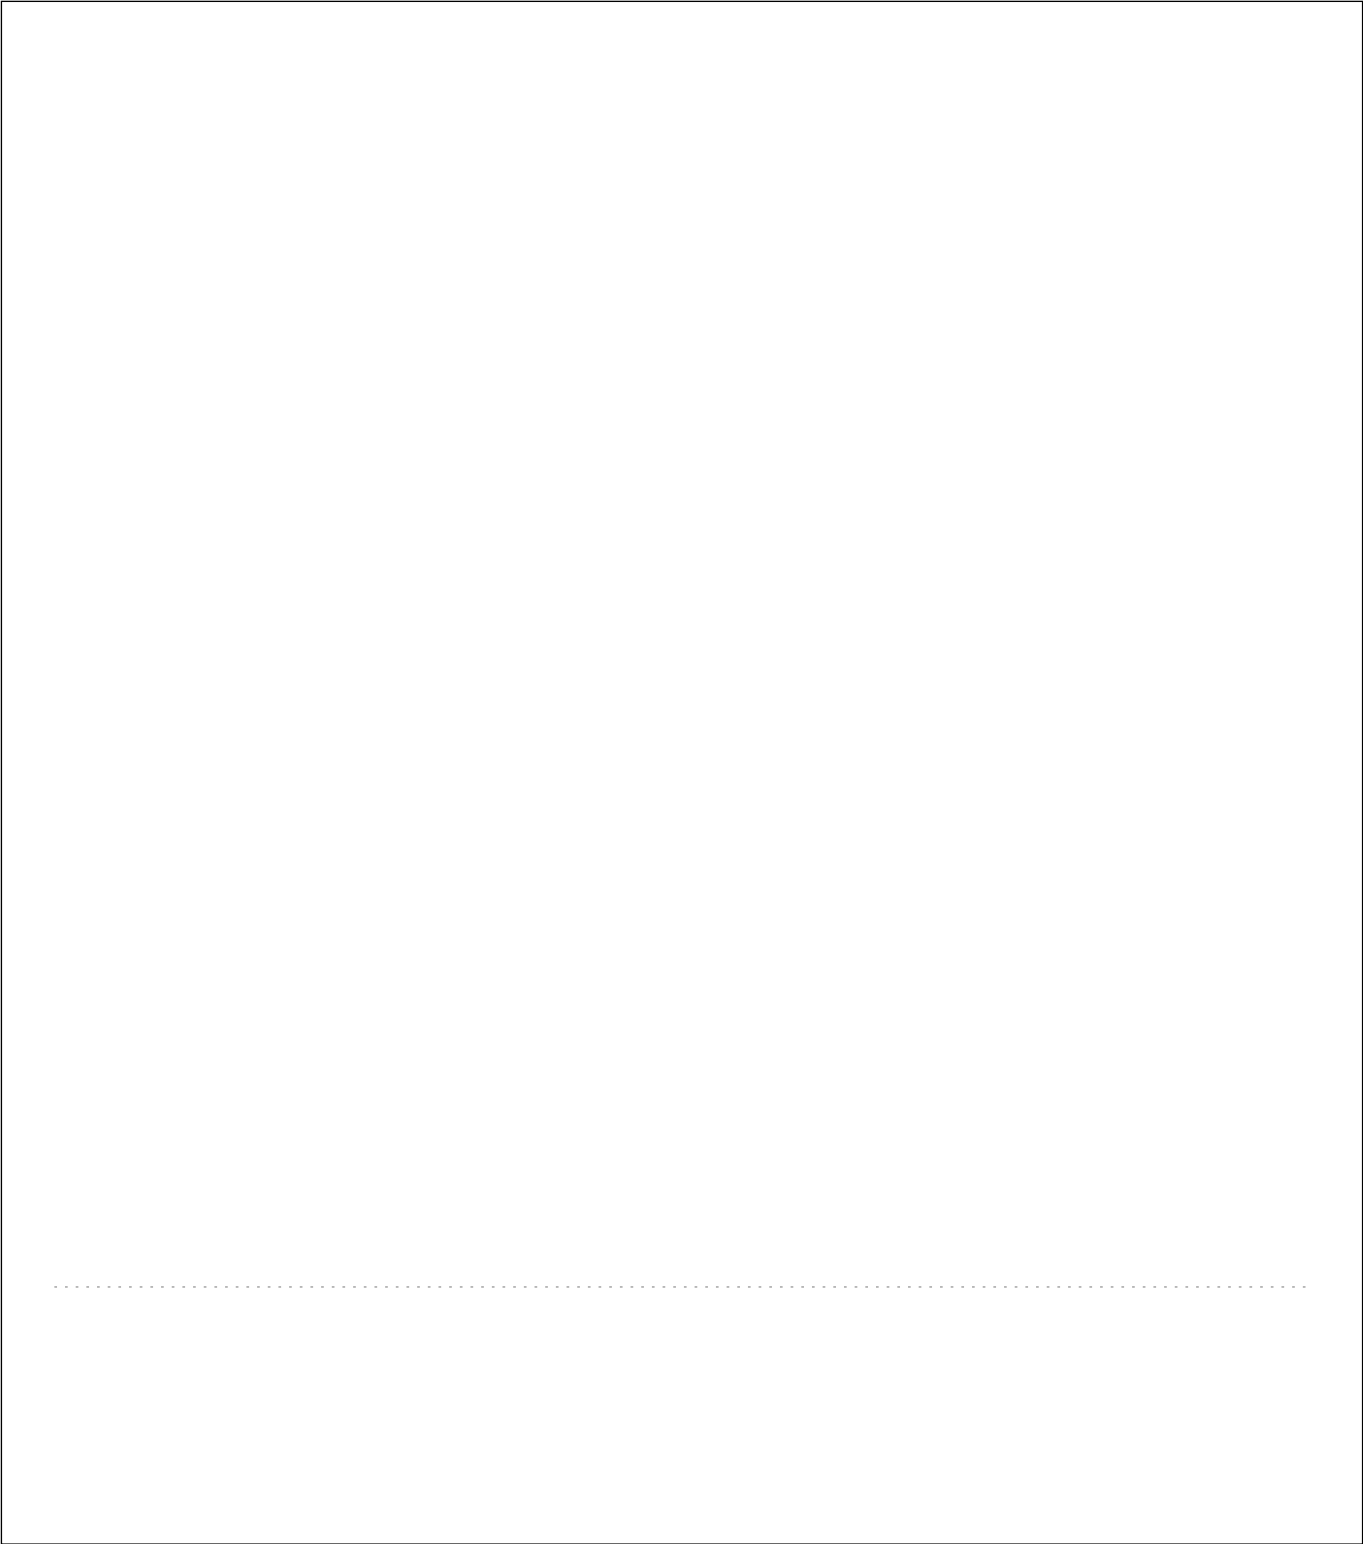

Crea un quartiere con cinque fogli di sagome: edifici, veicoli, parco e strade. Colora e prova diverse disposizioni prima di incollare. Le dimensioni sono simboliche, non in scala reale.

Materiali

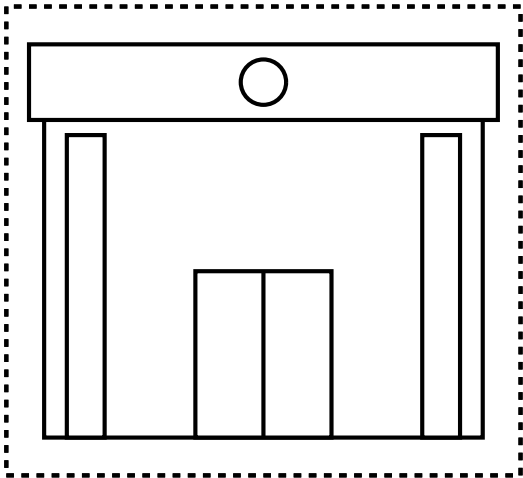

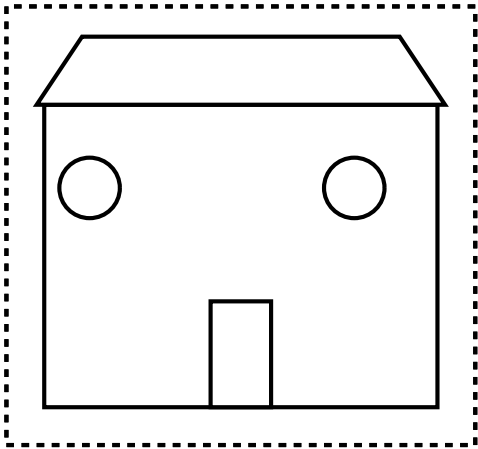

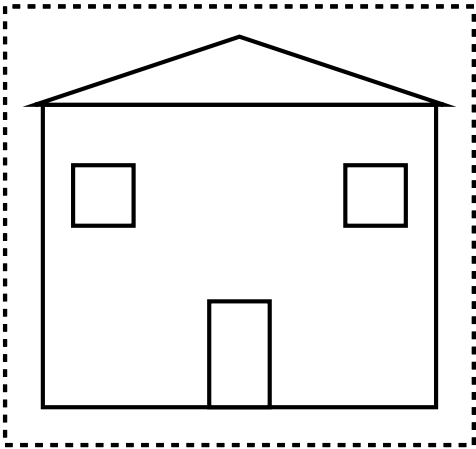

Carta A4 o Letter nel formato scelto; pastelli o matite colorate; righello. Per ritagliare, forbici adatte e aiuto adulto. Colla facoltativa.

1. Stampa al 100% o in dimensioni reali e controlla la linea di 50 mm. Le sette pagine contengono istruzioni, base, edifici, parco, veicoli, strade ed esempio.
2. Colora prima di tagliare. Con un adulto, ritaglia i rettangoli tratteggiati esterni. Conserva il margine bianco, senza tagliare finestre o piccoli spazi.
3. Disponi prima strade, poi edifici e parco. Prova un percorso da casa al parco prima di incollare. Questo modello immaginario non insegna le regole stradali locali.
4. Senza forbici, disegna sulla base o usa i fogli interi. Racconta dove andresti. Sagome alle pagine 2-6; esempio a pagina 7.
